04

Here's what you'll find in this **Presentation**:

- A detailed explanation of our problem and the solution.
- Entity Relationship Diagram (ERD).
- A working demo of our Project.
- Foresight after completing this project.
- Individual Contribution of each member of the group.
- Lastly, the challenges we have faced in this project.

# 01. Problem Explanation

## PROBLEM EXPLANATION

# What is Pool-Up?

POOL UP IS AN APP THAT  
CONNECTS STUDENTS WHO  
WANT TO SHARE RIDES.

01

02

03

04

## PROBLEM EXPLANATION

**What are we doing and Why  
are we doing it?**

**We are implementing a car pooling  
automatic management system that  
would keep a record of different  
students wanting to carpool and  
assign them with their fellow  
students Habib Community**

## PROBLEM EXPLANATION

### What are we doing and Why are we doing it?

Although is not much, but we considered that since students will be using our platform for car pooling, It can also contribute to helping the environment as one vehicle will now be used between more students, so can reduce carbon emissions per student too.

# 02. Entity Relationship Diagram (ERD)

# Final ERD

Areas		
area_ID	integer	
area_name	varchar(255)	
Add field		

Students		
ID	integer	
first_name	varchar(20)	
last_name	varchar(20)	
batch	integer	
area_ID	integer	
Add field		

Schedule		
student_ID	integer	
day	varchar(10)	
in_time	integer	
out_time	integer	
Add field		

Student Transport Modes		
student_ID	integer	
TM_ID	integer	
is_owner	boolean	
Add field		

Preferences		
pref_ID	integer	
student_ID	integer	
gender_pref	varchar(1)	
Add field		

Connected Areas		
students will define which areas come under their route		
student_ID	integer	
area_ID	integer	
Add field		

TransportModes		
TM_ID	integer	
vehicle	varchar(255)	
capacity	integer	
Add field		

ValidTimes		
time_id	integer	
hour	varchar(5)	
minutes	varchar(255)	
Add field

04

## Breakdown of Individual Contribution

### Burhanudin

- Gave the main idea and Proposal.
- Creating ERD
- Implementing SQL Queries on back end.
- Guiding other members.

### M Hashim

- Windows Forms Apps and Front End.
- Collecting and Managing Data.
- Implementing SQL Queries on back end.

### Ali Muhammad

- Windows Forms App and Front End.
- Implementing SQL Queries.
- Project reports and presentation.

## FUTURE PLAN

## FUTURE PLAN

01

02

03

04

We plan to create a proper mainstream platform such as web application.

We plan to practically implement our system for the entire Habib Community.

01

03

04

# 05. Challenges

## CHALLENGES

01

02

03

04

Challenges we have faced:

- Time Management.
- Debugging problems.
- Generating a sample database.
